

## MEDICATION POLICY

**Generic Name:** Proton Pump Inhibitors

**Therapeutic Class or Brand Name:** Proton Pump Inhibitors

**Applicable Drugs** (if Therapeutic Class):

Preferred: Esomeprazole (generic), Lansoprazole (generic), Omeprazole (generic), Pantoprazole (generic), and Rabeprazole (generic).

Non-preferred: Aciphex® (rabeprazole), Dexilant® (dexlansoprazole), Nexium® (esomeprazole), Prevacid® (lansoprazole), Prilosec® (omeprazole), and Protonix® (pantoprazole).

Policy also applies to any other Proton Pump Inhibitors not listed.

**Date of Origin:** 2/1/13

**Date Last Reviewed/Revised:** 6/17/16

**GPI Code:** 4927002000, 4927002510, 4927004000, 4927006000, 4927007010, 4927007610

### **Prior Authorization Criteria (may be considered medically necessary when criteria I through II are met):**

- I. Documented diagnosis of one of the following A through G:
  - A. Gastroesophageal reflux disease (GERD).
  - B. Erosive esophagitis.
  - C. Gastric ulcers.
  - D. Risk reduction of NSAID-associated gastric ulcer.
  - E. Duodenal ulcers.
  - F. Eradication of *H. pylori*.
  - G. Hypersecretory conditions.
- II. Non-preferred PPIs require documented trials and failures of TWO preferred PPIs.

### **Exclusion Criteria:**

- No compounded solutions will be approved, including omeprazole/sodium bicarbonate.

### **Other Criteria:**

- N/A

### **Quantity/Days Supply Restrictions:**

---

*Disclaimer: Medication Policies are developed to help ensure safe, effective and appropriate use of selected medications. They offer a guide to coverage and are not intended to dictate to providers how to practice medicine. Refer to Plan for individual adoption of specific Medication Policies. Providers are expected to exercise their medical judgment in providing the most appropriate care for their patients.*

## MEDICATION POLICY

- Eradication of *H. pylori*:
  - 2 tablets/capsules or equivalent per day for 14 days only.
- Hypersecretory conditions:
  - Increased dosing beyond 60 tablets/capsules or equivalent per 30 days is approvable.
- All other diagnoses:
  - Up to 30 tablets/capsules or equivalent per 30 days.
  - Up to 60 tablets/capsules or equivalent per 30 days is approvable if the patient does not respond after a 10 consecutive day trial of once daily dosing.

### Approval Length:

- **Authorization:** 1 year.
- **Re-Authorization:** An updated letter of medical necessity or progress notes showing current medical necessity criteria are met and that the medication is effective.

### Appendix:

N/A

## MEDICATION POLICY

<b>Historical Tracking Of Changes Made To Policy</b>	
6/17/2016	1. Fixed formatting of tracked changes made on 6/1/16.
6/1/2016	1. <b>Changed</b> “Preferred: Lansoprazole (generic), Nexium (esomeprazole), Omeprazole (generic), Pantoprazole (generic), and Rabeprazole (generic); Non-preferred: Aciphex (rabeprazole), Dexilant (dexlansoprazole), Prevacid (lansoprazole), Prilosec (omeprazole), Protonix (pantoprazole); Policy also applies to any other Proton Pump Inhibitors not listed” to “Preferred: <b>Esomeprazole (generic)</b> , Lansoprazole (generic), Omeprazole (generic), Pantoprazole (generic), and Rabeprazole (generic); Non-preferred: Aciphex (rabeprazole), Dexilant (dexlansoprazole), <b>Nexium (esomeprazole)</b> , Prevacid (lansoprazole), Prilosec (omeprazole), Protonix (pantoprazole); Policy also applies to any other Proton Pump Inhibitors not listed” <b>under Applicable Drugs.</b>
7/10/2015	<p>1. <b>Changed</b> “Preferred, no prior authorization required: Lansoprazole (generic), Nexium® (esomeprazole), Omeprazole (generic), Pantoprazole (generic), and Rabeprazole (generic); Non-preferred, prior authorization required: Aciphex® (rabeprazole), Dexilant® (dexlansoprazole), Prevacid® (lansoprazole), Protonix® (pantoprazole)” to “Preferred: Lansoprazole (generic), Nexium® (esomeprazole), Omeprazole (generic), Pantoprazole (generic), and Rabeprazole (generic); Non-preferred: Aciphex® (rabeprazole), Dexilant® (dexlansoprazole), Prevacid® (lansoprazole), Prilosec® (omeprazole), Protonix® (pantoprazole); Policy also applies to any other Proton Pump Inhibitors not listed” <b>under Applicable Drugs.</b></p> <p>2. <b>Changed</b> “II. Non-preferred PPIs require documented trials and failures of or contraindications to ALL preferred PPIs, given at maximum doses (Lansoprazole, Nexium®, Omeprazole, Pantoprazole, and Rabeprazole). Requests for a non-preferred PPI must include documentation from chart notes showing ALL of the following A through E: A. Date of trial initiation for each preferred PPI; B. Length of trial for each preferred PPI; C. Dose(s) tried for each preferred PPI; D. Daily dosage level of medication for each preferred PPI; E. Detailed explanation of the nature of each failure for each preferred PPI” to “II. Non-preferred PPIs require documented trials and failures of TWO preferred PPIs” <b>under Prior Authorization Criteria.</b></p> <p>3. <b>Removed</b> “Non-preferred PPIs may be considered medically necessary when treatment with all of the preferred PPIs, given at maximum doses, have been ineffective, contraindicated, or not tolerated” and “Ineffective treatment is defined as gastric-peptic symptoms (such as heartburn) not resolved after ten consecutive days of treatment” <b>from Other Criteria.</b></p> <p>4. <b>Changed</b> “For Omeprazole 20mg: up to 60 tablets/capsules or equivalent per 30 days; Increased dosing up to 120 tablets/capsules or equivalent per 30 days is approvable if the patient does not respond after a 10 consecutive day trial of 2 tablets/capsules or equivalent per day daily dosing; Increased dosing beyond 120 tablets/capsules or equivalent per 30 days is approvable for hypersecretory conditions; For all other PPIs: up to 30 tablets/capsules or equivalent per 30 days; Increased dosing up to 60 tablets/capsules or equivalent per 30 days is approvable if the patient does not respond after a 10 consecutive day trial of once daily dosing; Increased dosing of 2 tablets/capsules or equivalent per day for 14 days only may be approved for eradication of H. pylori; Increased dosing beyond 60 tablets/capsules or equivalent per 30 days is approvable for hypersecretory conditions” to “Eradication of H. pylori: 2 tablets/capsules or equivalent per day for 14 days only; Hypersecretory conditions: Increased dosing beyond 60 tablets/capsules or equivalent per 30 days is approvable; All other diagnoses: Up to 30 tablets/capsules or equivalent per 30 days; Up to 60 tablets/capsules or equivalent per 30 days is approvable if the patient does not respond after a 10 consecutive day trial of once daily dosing” <b>under Quantity/Days Supply Restrictions.</b></p> <p>5. <b>Updated</b> “<a href="http://www.health.utah.gov/medicaid/pharmacy/priorauthorization/pdf/Proton_Pump_Inhibitors.pdf">http://www.health.utah.gov/medicaid/pharmacy/priorauthorization/pdf/Proton_Pump_Inhibitors.pdf</a>” to “<a href="https://medicaid.utah.gov/pharmacy/priorauthorization/pdf/PPI.pdf">https://medicaid.utah.gov/pharmacy/priorauthorization/pdf/PPI.pdf</a>” <b>under References.</b></p>
