

Generic Name: Cenegermin-bkbj Therapeutic Class or Brand Name: Oxervate Applicable Drugs: N/A Preferred: N/A Non-preferred: N/A Date of Origin: 2/24/2025 Date Last Reviewed / Revised: N/A

PRIOR AUTHORIZATION CRITERIA

(May be considered medically necessary when criteria I through V are met)

- I. Documented diagnosis of neurotrophic keratitis (NK) and meets ALL the criteria below:
 - A. Diagnosis of Stage 2 (persistent epithelial defect [PED]) OR Stage 3 (corneal ulcer) NK.
 - B. Treatment failure, intolerance, or contraindication to the following conventional nonsurgical treatments (i AND ii):
 - i. One over-the-counter artificial tear product (e.g., Systane, Refresh, TheraTears, GenTeal, etc.).
 - ii. Therapeutic (bandage) contact lenses.
 - C. Contraindication to surgical procedures (e.g., amniotic membrane transplantation, surgical tarsorrhaphy, etc.).
 - D. Documented specific eye(s) intended for treatment.
- II. Minimum age requirement: 2 years old.
- III. Treatment must be prescribed by or in consultation with an ophthalmologist or optometrist.
- IV. Request is for a medication with the appropriate FDA labeling, or its use is supported by current clinical practice guidelines.
- V. Refer to the plan document for the list of preferred products. If the requested agent is not listed as a preferred product, must have documented treatment failure or contraindication to the preferred product(s).

EXCLUSION CRITERIA

• N/A

OTHER CRITERIA

• N/A

QUANTITY / DAYS SUPPLY RESTRICTIONS

• One affected eye: 28 vials per 28 days

• Two affected eyes: 56 vials per 28 days

APPROVAL LENGTH

- Authorization: 8 weeks
- **Re-Authorization:** 8 weeks. Maximum treatment duration is 16 weeks per eye.
 - Renewal may be considered on a case-by-case basis with documentation of continued indicators of active disease (e.g., neurotrophic lesions, positive response to therapy, and absence of clinically significant adverse events).

APPENDIX
